Subject: Urgent Information required - Oracle Displacements

In preparation for our upcoming earnings release conference call we need information about any Oracle displacements for 2001, 2002 or thus far in 2003. What we're looking for is those customer that have displaced any Oracle application with PeopleSoft in the recent past to mention in our conference call. **We are not looking for permission from the customers to use their names so please ask the sales teams not to start that process.** (I believe that recent examples of displacements include Maryland and Nextel.)

Please forward this on to your MDs and RVPs as appropriate

A quick response with a list of names, applications and year of sale is needed by Wednesday , close of business.

Kevin
