---

Hi,

Since we came back from L.A. my wife was in hospital she had nervous problem, a kind of nervous break down in relation to all the problem we had in Mexico it all came back for her and me, it was to much to take.

Everything happens in 2001, we where over with that situation, going on with our life and now it came back, we are to nervous, to afraid, we are putting ourself in danger, these mexicans have no respect for human life and since that time we cant sleep at night, I cant perform on my works, my kids are mad after us because they know all the danger to be involved with a "mexican Mafia" full of money. I am sorry but I would like to leave all this behind us.

Hard for me to speak on the phone, we have all the kids and there kids at home to help my wife, it's to boot of us ours birthday, please contact me by e-mail if necessary.

*Jean G Lamarche* ☺
